The proposed age/sex distribution seems reasonable to me.

Subject: OPP Des. 1.228 Adult

Hello,

I am writing in response to our prior conversation regarding new adult age/sex test design for OPP Designation 1.228 'Adults'. I would like to propose the following age/sex design:

Test 100 adults ages 18 to 75, 50 males and 50 females. Distribute these has follows:

- 36 adults 18-38 years of age, 18 female and 18 male (21 year range)
- 36 adults 39-59 years of age, 18 female and 18 male (21 year range)
- 28 adults 60-75 years of age, 14 female and 14 male (16 year range)

I hope to have time tomorrow afternoon to call you and discuss. Thanks.

Please do not hesitate to contact me with any further questions or comment.

Rich
